Interview Summary

Paper No. and ho20070805

examiner's signature, if required

Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Proposed amendments were discussed, including amending the claims to include an "interruption" which couples at least two of the plurality of slits. It was noted by the Examiner that the intially proposed amendments would most likely read on Fig. 8 of the Paul et al. reference. It was further noted by by the Examiner that the term "interruption" does not appear to have support in the specification. Further propsed amendments included adding structural limitations regarding the tunnels of the device and how they are arranged with regard to the interuptions and the slits.
